

Our Custom High-Efficiency Rebate Program rewards you for installing high-efficiency process or control equipment tailored to your unique needs.

custom HIGH-EFFICIENCY REBATE PROGRAM

Want a partnership that pays?

Whether you're engineering or re-engineering your facility, one of the most economical ways to lower operational costs and increase business profits is to incorporate energy efficiency. As your local utility, we encourage your innovative ideas to help make your facility more energy efficient. Our custom rebates pay you for saving energy and reducing peak demand during the summer period (June through September).

commercial & industrial

By installing energy-efficient equipment, your business can reduce its electricity, operating and maintenance costs, while increasing return on investment. Here are just a few examples of Custom High-Efficiency Rebate Program installations:

- Air compressor improvements
- Motor downsizing
- Efficient refrigeration
- Heat recovery systems
- Variable air volume systems
- Thermal storage
- Process technologies
- Energy management systems
- Select variable speed drives
- Condensers

Do you qualify?

All business customers we serve are eligible for rebates. Applicant must be the end-user of the equipment. Rebates are available for custom installations that meet the following qualifications:

- Useful equipment life of at least five years
- Payback of less than six years
- May require review by a utility-approved engineer
- Equipment not covered under our prescriptive rebate programs

How do you participate?

Just follow these easy steps:

1. Call us to discuss eligibility of your idea.
2. Complete the Custom High-Efficiency Rebate application.
3. Send your completed application to us for approval before ordering the high-efficiency equipment.
4. Contact us to inspect your old equipment prior to installation of the new equipment.
5. After your new high-efficiency equipment is installed, submit the invoices to us and we will inspect it before issuing your rebate check.

Rebate funds may be limited, so please contact us to confirm availability. **Additional guidelines can be found in the terms and conditions on the back of the Custom High-Efficiency Rebate application.**
