

SMMPA Member Low-Income Program

Your SMMPA Member utility, in collaboration with the Community Action Partnership (CAP) Agencies listed on the back, provides energy-efficient **ENERGY STAR**[®]-rated products to qualified low-income homeowners. The utility covers the cost of replacing inefficient lighting and certain working appliances that are at least 10 years old (limits apply).

While making weatherization/conservation service visits to low-income households, the CAP Agency looks for potential installation of the following **ENERGY STAR**-qualified equipment:

- Compact Fluorescent Lamps (CFLs)
- Refrigerators
- Room air conditioners
(not applicable in Grand Marais)
- Clothes washers
- Microwave ovens
(do not have to be ENERGY STAR qualified)

If you are interested in learning more about this program, please contact your local CAP Agency to determine your eligibility. Funding is limited.
